TRAXLOGIX™

USB charger and memory reader for Traxlogix battery packs

FEATURES

- Charge Led indicator
- Compatible with low-power USB hubs
- Factory-adjustable charge current
- Maintenance-free
- RoHS-compliant

APPLICATIONS

The TUR-100 is specially designed to charge all Traxlogix rechargeable battery packs using the power from a USB computer port. A reader is also included, allowing quick downloading of the content of the battery pack's memories during the charging process.

DESCRIPTION

The **TRAXLOGIX** TUR-100 USB charger is compatible with all rechargeable Traxlogix battery packs. The charge current can be adjusted during production in order to be compatible with all USB ports. The CD-ROM included in the package contains a virtual serial port driver. Data can be downloaded directly from the battery's memory into the computer using the HyperTerminal software included with all versions of Windows. Various forms of third-party software are available, among them advanced database storage and mapping features. Please contact us for more information.

COMPATIBILITY

The TUR-100 is compatible with the following Traxlogix rechargeable battery packs :

- BS-118 (charge and memory read)
- BS-236 (charge and memory read)
- BS-315 (charge and memory read)
- BP-165 (memory read)
- BP-155 (memory read)
- PSC-900 (memory read)
- PSC-800 (memory read)
